Professional Summary

Ambitious and motivated Software Engineering Technology – AI student at Centennial College with a strong foundation in Python, JavaScript, C#, SQL, and web application development. Experienced in both front-end and back-end programming, database management, and the software development lifecycle, with hands-on exposure to multi-tiered architectures, testing, and Agile methods. My professional background in finance has strengthened my analytical, organizational, and teamwork skills, which translate seamlessly into collaborative software development and R&D environments. I bring a strong curiosity for learning new technologies, creativity in problem-solving, and the ability to contribute meaningfully to fast-paced, multidisciplinary teams. Passionate about working on projects that have a direct impact on end users, I am eager to apply both my technical expertise and transferable skills to support innovative software development initiatives.

Skills & Competencies

Proficient in Python, JavaScript, Java, C#, HTML/CSS, SQL/MySQL. Familiar with object-oriented programming, database management, and multi-tier architectures (data, logic, presentation layers). Experienced with Git/GitHub, Agile methods, testing/QA, and documentation (SRS, SSD). Additional tools: JIRA, MS Office Suite, MS Teams, QuickBooks. Bilingual in English and Spanish.

Education

Software Engineering Technology - Artificial Intelligence (Co-op) Advanced Diploma Sep 2023 - Present
Centennial College, Toronto, ON

Courses: Linux/Unix OS

Testing & Quality Assurance
